

"In the field of observation chance favours only the prepared mind"

Educational tour provides students with an opportunity to learn practically through observation, interaction and hands on activities. A visit to AFCME(Air Force Medical Central Establishmen, subroto park was organized on May 10, 2019 for the students of class XI B. The resource person for the visit was Dr Sheeva Goswamy who shared the various diagnostic test and researches undertaken by AFMCE and their significance with our students.

Students observed the various diagnostic test like ABO blood grouping , ELISA,TMT,ECG and ECHO from the haematolgy laboratory and non invasive cardio laboratory respectively .The students voluntarily undergone for above mentioned test to understand the working of theses machinery and also to know that how they help to find out the abnormality. The cardiologist also taught CPR technique to the students to tackle any emergency situation.

The students enjoyed the workshop and they learnt the various test used at haematogy and non invasive cardio laboratory.
